## PROJECT

### MY OWN PORTFOLIO

- I created a portfolio app that showcases my personal and professional achievements, skills, and projects. The app uses Tailwindcss with React.

### SOCIAL MEDIA POST APP - CHATAPP CLONE

- A web application that allows users to create, edit, and delete social media posts. The app uses React and Local database that provides features such as filtering, and searching.

### TO DO LIST APP - CRUD OPERATION

- I developed a to do list app that allows users to create, read, update, and delete tasks. The app uses React and local database to store the tasks and their status, and provides features such as filtering, and searching.
